Self Assessment

What were you trying to do?

        For this project, I was trying to recreate that world for my creative taste. I wanted to create an authentic world that Cube presented. I was trying to get more content that I edited or cut more to my liking. Which I believe for this project I went more for a mid-dark magical tone.

        ○   How did you succeed?

        I believe I succeed in looking for content that I liked/ or knew I would be able to manipulate into what I was looking for. For most of the magic sounds I went into a DAW and either changed the speed, or the EQ for the sound. I do believe that with this project I was a bit better at asking for help.

        Where did you struggle?

        I struggled with knowing Wwise. I definitely feel that I need to go back and rewatch/ reread thet lessons. I'm hoping to set up time for myself to at least watch the videos again. I also didn't set myself up for success when I was starting work on this project, I thought it would be a good idea to delete things that in my mind would minimize Wwise. I definitely thought harder, not smarter.
